The Footprint Project

WHAT DOES YOUR DIGITAL FOOTPRINT SAY ABOUT YOU?

Task 1: Google **yourself!**

Type your name into Google (search and images) and see what comes up on the first few pages! What information can you find about yourself? If there is nothing about you, what does come up for your name?

Once you have found some interesting information, take a screen capture of your results. To do this, search **"Snip"** in the Start Menu and take a screen shot of what you found. Save the file (name.png) and add to DMI folder.

Task 2: Create a Word Cloud

Using **Wordle** or **Tagxedo** create a visual representation communicating positive key words that classify and describe safe online use and content.

Task 3: Construct an Information Diagram

Try **Infogr.am**, **Piktochar**t or **Postermywall** to bring awareness by educating the digital community on how to be responsible and respectful digital citizens.

A thoughtful youtube comment

Blog About it!

DMI 8 → I CAN...

o I can be intentional within my digital community.

...Are my digital decisions intentional?

o I can be aware of the impact of my digital decisions.

...Am I aware of my digital footprint?

o I can communicate responsibly and respectfully within my digital community.

...Am I a responsible communicator in my digital community?
